Network Requirements

It is recommended to have a broadband connection.

For institutions using network monitoring software, eDynamic Learning can provide a whitelist of all external internal links upon request to support@edynamiclearning.com.

Hardware Requirements

For best performance, it is recommended that your computer have at least 2GB of RAM and is not older than five years.

1. There may be some exceptions to the requirements listed above due to your institution's Learning Management System. Please refer to your Learning Management System Administrator for more information.
2. Some courses, specifically software training courses, require third-party software. This third-party software may have additional technology requirements. See the Required Materials document for more information.
3. For mobile devices, please ensure that the device meets the Operating System requirements above.
4. For client's utilizing our hosted Learning Management System Agilix Buzz, Agilix's specific requirements can be found here: Buzz System Requirements.
